15 October 2013

Dear Mr Guillaume Duchemin

Data on French artists and private galleries

Further to our correspondence we would be happy to offer data about the exhibition history (2005-2013) of French artists and the top French galleries. The data will be provided in through an Application Programming Interface (API)

A) The artist data will be structured in 3 sets with 4 tables.

1. Main data table with one row per artist:

```
id                                          : internal artist_id
mergedIDs                                   : previous artist_id
timestamp                                   : data of data creation
name                                        : name of the artist
nationality                                 : nationality of the artist
birth location                              : birthlocation of the artist
birth day                                   : birth day of the artist
birth month                                 : birth month of the artist
birth year                                  : birt year of the aritist
attributes                                  : sex or artist group
media                                       : techniques used by artist
r00                                         : current ranking
r01, r02, r03, r04, r05, r06, r07, r08      : ranking previous years
awards                                      : Awards as listing
website                                     : web site of the artist
all-shows-first                             : first show of the artist
all-shows-total                             : total number of shows
```

2. Detailed data table with data on Exhibitions between 2005 and 2013

```
id                            : internal artist_id
mergedIDs                     : previous artist_id
timestamp                     : data of data creation
name                          : name of the artist
show-type                     : solo or group show
BeginDate                     : exact begin
EndDate                       : exact end
Title                         : title of the show
city, country                 : location of the show
organizer                     : institution
type                          : type of institution
```

3. Overview data tables with information on:

i. Exhibitions between 2005 and 2013

```
id                            : internal artist_id
mergedIDs                     : previous artist_id
name                          : name of the artist
year                          : exhibition year
type                          : type of institution
number                        : number of exhibitions
```

ii. Auctions between 2005 and 2013

```
id                            : internal artist_id
mergedIDs                     : previous artist_id
name                          : name of the artist
year                          : auction year
auction-sales                 : sum of sales in USD
lots-sold                     : number of sales
```

B) The gallery data will be structured in 2 sets with 3 tables.

1. Main data table with one row per gallery:

```
id                            : id of the gallery
name                          : name of the gallery
street, zip, city, country    : address of the gallery
foundation                    : foundation year
directeurs                    : name(s) of director
profile                       : short text about gallery
tel, email                    : contact
www                           : website
map                           : maps.google
fairs-total                   : number of art fairs
fairs-abroad                  : number of fairs outside FR
fairs-in-FR                   : number of fairs in FR
```
